

- They maintain or renew the waterproofing required to make breathable items breathe – so you don't get wet from your own sweat. Suitable for use on Gore-Tex® and SympaTex® garments*
- The active ingredients are carried in water and will soak in wherever water can get in, i.e. WaterBased products target leaks
- The tough flexible TX-10® elastomer coats all the fibres not just the surface so doesn't get rubbed off by grass, rucksack straps, etc
- Soaks in exactly where needed; no missed areas or over application problems
- You get more waterproofing power for your money
- Nikwax® products are continually developed through scientific studies to keep ahead of new garment and equipment technologies

Nikwax® WaterBased products keep you dry because

DRIER

- For the user because they:**
- Are non-toxic
 - Are non-flammable
 - Do not give off fumes
- For the environment because they:**
- Prolong the life of your gear so less of the Earth's resources are used to make new gear
 - Do not contain harmful chemical solvents
 - Do not contain animal damaging propellant gases
 - Do not contain animal products
 - Are not tested on animals
 - Are packed in recyclable containers

Nikwax® WaterBased products are safe

SAFER

- Footwear treatments**
- Do not have to be ironed or tumble dried to activate materials – no need to dry before waterproofing
 - Work first time – no need to wait and re-apply
 - Have an easy to use sponge applicator – all the product goes on the footwear
 - Do not require any warming of wax treatments or the boot
- Equipment treatments**
- Can be painted on, washed in, soaked in a bucket or sprayed on
- Fabric treatments**
- Do not have to be ironed or tumble dried to activate materials – no need to dry before waterproofing
 - Jacket be tumble-dried on a high heat? You don't have to with Nikwax®
 - Can be applied in the washing machine
 - Can be applied by hand

Nikwax® WaterBased products are easy to use because

EASIER

WET WEATHER? NO PROBLEM
