Nikwax MRSL Statement

Nikwax Ltd is committed to ensuring the use of hazardous chemicals is restricted within the company and our value chains. As part of our Chemical Management System, we have developed a comprehensive Manufacturing Restrictive Substances List (MRSL) that restricts the input of hazardous chemicals in our manufacturing process and our products.

The Nikwax MRSL adopts the Zero Discharge of Hazardous Chemicals (ZDHC) MRSL and all known per- and polyfluoroalkyl substances (PFAS or otherwise known as PFCs) as identified by the US Environmental Protection Agency (EPA). The Nikwax MRSL is not limited to the chemicals included on these lists and additional chemicals of concern may be included.

ZDHC MRSL - <https://mrsl.roadmaptozero.com/>

EPA PFAS Master List - [https://comptox.epa.gov/dashboard/chemical\\_lists/pfasmaster](https://comptox.epa.gov/dashboard/chemical_lists/pfasmaster)

There will be no intentional use of any of the chemicals included on the Nikwax MRSL. We require all of our suppliers to sign a declaration that the products they supply us with comply with our MRSL. We undertake annual wastewater testing at our manufacturing facility to verify compliance.

The Nikwax MRSL will be reviewed annually to reflect changes in the ZDHC and EPA lists.
